

Polyblaster Cryogenic Tumbler

Model 300 Liquid Nitrogen Deflashing Tumbler

The Polyblaster Cryogenic Tumbler Deflashing Machine from Abrasive Supply Company (ASC) is specially designed to deflash rubber and zinc-aluminum parts. The Model 300 is primarily used to initially break parts loose from a mold sheet. It also removes stringy flash that clogs up a typical cryogenic deflashing machine. The Model 300 is effective cleaning a variety of parts. This machine can use special steel balls or other media to clean parts with thru holes.
